English

Hindi

Marathi

Certifications

AWS Certified Cloud Practitioner
Nov 2022

Infosys AWS Certified Cloud Practitioner

Infosys Certified AWS Public Cloud Associate

Infosys Certified AWS Solution Architect Associate

Education

Shivaji University, Kolhapur
Electronics
Bachelor of Engineering

Summary

AWS Cloud Engineer with 7+ years of IT industry experience, including 4 years specializing in **AWS cloud** infrastructure and 1 year in **Terraform**. Skilled in designing, automating, and managing scalable cloud environments using Infrastructure as Code. Currently expanding expertise in **AWS Cloud Security** to strengthen cloud governance, compliance, and data protection capabilities.

Experience

Infosys Limited — **Aug 2022 to Present**
Senior Associate Consultant — Pune, Maharashtra

- Managed and maintained AWS environments including EC2, S3, IAM, VPC, CloudWatch, and Route 53.
- Provisioned and configured EC2 instances, AMIs, and Auto Scaling Groups to support dynamic and scalable workloads.
- Designed and implemented secure VPC architectures with subnets, NAT gateways, route tables, and network ACLs.
- Administered IAM users, groups, roles, and policies to enforce the principle of least privilege and strengthen access security.
- Managed S3 buckets with versioning, lifecycle policies, and cross-region replication to ensure data durability and cost optimization.
- Performed incident management, troubleshooting, and root cause analysis to ensure high system availability and seamless customer experience.
- Designed and implemented Infrastructure as Code (IaC) using Terraform to provision and manage AWS resources across multiple environments.
- Developed and maintained reusable Terraform modules for core AWS services such as VPC, EC2, RDS, IAM, and S3, improving modularity and reducing code duplication.
- Managed remote state using Amazon S3 with state locking via DynamoDB to ensure safe and concurrent infrastructure operations.
- Reduced infrastructure deployment time by **80%** through reusable Terraform modules and automation.
- Improved environment reliability and scalability by implementing auto-scaling and proactive monitoring with CloudWatch.
- **Hosted a static website on AWS S3** using Terraform; configured bucket policy and static web hosting for public access.
- Automated deployment of **NGINX web server using EC2** and user data scripting.
- Implemented **IAM policies and roles using Terraform** to enforce least privilege access

Progressive Info vision Pvt Ltd — **Mar 2019 to Aug 2022**
Desktop Support Engineer — Mumbai, Maharashtra

- Analyzed and resolved complex incidents and requests related to end-user software and hardware devices (laptops and desktops) and user software.
- Installed, configured, administered, and troubleshot Windows environments.
- Provided extensive support for Microsoft Active Directory (group membership, shared drives access, policies).
- Diagnosed and resolved problems with user connectivity and equipment.
- Validated and approved VPN access for all remote users.
- Assisted in technical upgrades and maintenance of the entire desktop system.
- Supported testing and deployment of new applications and systems.
- Trained and guided staff on hardware and software usage and security best practices.
- Achieved first-call resolution in a timely manner.
- Simultaneously developed foundational AWS cloud knowledge through internal projects and hands-on experience.

Magna InfoTech — **Oct 2016 to Feb 2017**
Technical Support Associate — Pune, Maharashtra

- Performed first-line troubleshooting, understood customer queries, and resolved customer problems.
- Provided email support to customers within defined time limits.
- Served as the first point of contact for customers seeking technical assistance over the phone and via email.
- Handled the HPSM tool for incident tracking, creating tickets automatically and manually with detailed information for each customer issue.
